### REMARKS

Reconsideration of the above-referenced application is respectfully requested in view of the above amendments and these remarks. Claims 1-2, 4, 10, 16-18, 21, 25-30, 34 and 45-49 are currently pending. Applicants have amended claims 1, 4, 10, 16, 21, 25, 26, 28 and 34, cancelled claims 3, 6, 9, 20 and 33 and added claims 45-49.

According to the Office Action claim 1 is objected to as including the term "selected" in line 10 as an informality. In accordance with the helpful suggestion, Applicant has deleted this term and has made corresponding changes in other claims.

Claims 1-4, 6 and 28-30 are rejected under 35 U.S.C. § 103(a) as being unpatentable over United States Patent Application Publication No. 2002/0101858 A1 to Stuart et al. in views of United States Patent Nos. 6,748,217 B1 to Hunzinger et al. and 5,559,862 to Bhagat et al. Claims 16 and 27 are rejected under 35 U.S.C. § 103(a) as being unpatentable over United States Patent Application Publication No. 2002/0013163 A1 to O'Prey in view of Hunzinger et al. Claims 17-18 are rejected under 35 U.S.C. § 103(a) as being unpatentable over O'Prey in view of Hunzinger et al. and further in view of United States Patent Application Publication No. 2004/0042613 A1 to Phillips. In addition, claims 9, 10, 20, 21, 25, 26, 33 and 35 are objected to as being dependent upon a rejected base claim but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Applicant notes with appreciation that the subject matter of these claims is deemed to be allowable if rewritten to include all limitations of the superseding and rejected claims. The Applicants respectfully disagree with the Examiner's rejections set forth in the present office action. However, desiring to expedite the issuance of a patent for the present invention and in view of the Examiner's indications of amendments that would confer allowance, the Applicants have sought to amend the claims in accordance with the Examiner's suggestions. Applicants have amended the claims in such a way to clarify the format and language of the claims. In addition, claims 45-49 have been added. These claims correspond to claims previously presented and depend upon claims that are stated as allowable. No new matter is entered by way of the new claims. No remaining grounds for

Belkin et al.  
Case No. CE10641R

rejection or objection being given, the claims in their present form are asserted to be patentable over the prior art of record.

As the Applicants have overcome all substantive rejections and objections given by the Examiner and have complied with all requests properly presented by the Examiner, the Applicants contend that this Amendment, with the above discussion, overcomes the Examiner's objections to and rejections of the pending claims. Therefore, the Applicants respectfully solicit allowance of the application. If the Examiner is of the opinion that any issues regarding the status of the claims remain after this response, the Examiner is invited to contact the undersigned representative to expedite resolution of the matter.

Please charge any fees associated herewith, including extension of time fees, to 50-2117.

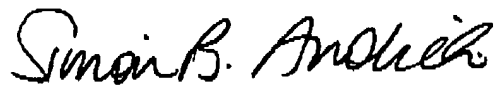

Respectfully submitted,  
Belkin, Anatoly S. et al.
